

FleetFix - FRD Customer

Functional Requirements Document (FRD)

FleetFix – Customer App

Module 1: Customer App – Authentication & Onboarding

1. Introduction

This module covers all entry points into the FleetFix Customer App, including the splash screen, onboarding introduction, account registration, and login.

It ensures that:

- First-time users see the splash and onboarding slides
- Returning users are routed based on session token validity
- Customers can create accounts using mobile, email, or social login
- Accounts are validated via OTP
- Password policies, terms acceptance, and session handling are enforced

Scope: Mobile apps (iOS & Android)

2. Functional Requirements

FRD 1: Welcome & Splash

ID	Description	Backend Notes
1.1	Display splash screen with logo for a minimum of 2 seconds	Static asset, remote config
1.2	Validate app version against backend minimum	<code>GET /system/app-version</code>
1.3	Check existing session token in secure storage	Keychain / Keystore
1.4	Route user to Home if token is valid	<code>POST /auth/validate-token</code>
1.5	Clear invalid token and route to Login with expiry message	Session cleared

FRD 2: Signup (OTP-First)

ID	Description	Backend Notes
2.1	Allow signup using mobile number as primary identifier	<code>POST /auth/send-otp</code>
2.2	Send OTP to mobile number	OTP valid for 5 minutes
2.3	Allow login/signup using OTP	<code>POST /auth/verify-otp</code>
2.4	Mark account as <code>PENDING_PROFILE</code> until email & terms provided	<code>user_status = PENDING_PROFILE</code>
2.5	Allow Google & Apple social login	OAuth2

FRD 3: Email & Terms

ID	Description	Backend Notes
3.1	Require email after OTP verification	Email must be unique
3.2	Require acceptance of Terms & Privacy Policy	<code>terms_accepted = true</code>
3.3	Block onboarding if terms not accepted	Error shown

FRD 4: Payment Method Setup

ID	Description	Backend Notes
4.1	Allow payment method addition during onboarding	Cards, Apple Pay, Google Pay
4.2	Tokenize payment via gateway	No raw card storage
4.3	Allow skip but prompt at first booking	<code>has_payment = true/false</code>
4.4	Allow setting default payment method	<code>default_payment_id</code>

FRD 5: Permissions

ID	Description	Backend Notes
5.1	Request location permissions	CoreLocation / FusedLocation
5.2	Request push notification permissions	APNs / FCM
5.3	Show explainer screens before OS prompts	CMS configurable

FRD 6: Login (Returning Users)

ID	Description	Backend Notes
6.1	Login using mobile number + OTP	OTP APIs
6.2	Login using mobile/email + password	<code>POST /auth/login</code>
6.3	Support biometric login	Token refresh
6.4	Lock account after 5 failed OTP attempts	15-minute lock

3. User Journeys

Journey A: First-Time Registration

- Enter mobile number
- Receive & verify OTP
- Enter email and accept terms
- Add or skip payment method

- Grant location & notification permissions
- Land on Home screen

Journey B: Returning User (OTP Login)

- Enter mobile number
- Verify OTP
- Routed to Home screen

Journey C: Returning User (Password Login)

- Enter mobile/email + password
- Token issued
- Routed to Home screen

Journey D: Session Auto Login

- App opened
 - Token validated
 - Direct to Home
-

4. User Stories & Acceptance Criteria

US-CUST-AUTH-01: OTP Registration

Acceptance Criteria

- Given a valid mobile number
- When OTP is requested
- Then OTP is sent and verified

US-CUST-AUTH-02: Email & Terms

Acceptance Criteria

- Given email entered

- When terms accepted
 - Then account becomes active
-

5. Edge Cases

- OTP expired
 - Wrong OTP (5 retries)
 - Duplicate email
 - Payment skipped
 - Permissions denied
 - Network failure during OTP
-

Module 2: Customer App – Dashboard & Service Selection

1. Introduction

Defines how customers interact with the Home Dashboard after onboarding.

2. Functional Requirements

FRD 7: Home Dashboard

ID	Description	Backend Notes
7.1	Display dashboard post login	Default landing
7.2	Display service category cards	GET /services/categories
7.3	Highlight promotions	CMS driven
7.4	Navigate to service flow	Deep links
7.5	Show current location on map	GPS
7.6	Display active bookings	GET /bookings/active

ID	Description	Backend Notes
7.7	Bottom navigation tabs	Standard UI

FRD 8: Roadside Assistance

ID	Description	Backend Notes
8.1	Select Roadside Assistance	<code>/services/roadside</code>
8.2	Show service types	Configurable
8.3	Confirm vehicle details	<code>/user/vehicles</code>
8.4	Auto-detect or enter location	Lat/Long
8.5	Estimate price	<code>/pricing/estimate</code>
8.6	Show Fixers, ETA, ratings	<code>/fixers/nearby</code>
8.7	Confirm booking & payment	<code>/booking/create</code>
8.8	Hold payment in escrow	Escrow logic
8.9	Live status updates	WebSocket
8.10	Rate, review, tip Fixer	Reviews API

3. User Journeys

Journey: Roadside Service

- Select service
- Confirm vehicle & location
- View price & ETA
- Pay → Fixer assigned
- Track → complete → review

4. Edge Cases

- GPS disabled
- No Fixers available

- Payment declined
 - Fixer cancellation
 - Customer cancellation
 - Dispute raised
-
