

Functional Requirements Document (FRD)

Project Name: MGC FREIGHT

Module: User

1. Introduction

This document outlines the functional requirements for the Landing Page of the **MGC Freight platform**. The purpose of this document is to detail the necessary features, use cases, user stories, and acceptance criteria to guide the development and design of the platform.

2. Functional Requirements

FRD 1: Login

ID	Description	Images/Notes
1.1	The system shall ensure that once the user completes the sign-up process, they will receive their credentials via email from the admin.	
1.2	The system shall ensure that the user can log in using their email and password.	The system shall ensure that the user can log in successfully. The system should

		enforce/ensure the MFA and strict Auth mechanisms.
1.3	The system shall ensure that when entering incorrect passwords or emails, the system will notify the user.	The system must ensure user account lockout after 5-10 failed login attempts. The system shall ensure the locked user account can be unlocked by an admin or authorized user.
1.4	The system shall ensure that only the authenticated user can be logged In.	
1.5	Forgot Password: The system shall ensure that on the login screen, there will be a "Forgot Password" button. Upon clicking it, the user will be navigated to the Forgot Password screen.	
1.6	• The system shall ensure that when the user wants to reset or update their password, they will be required to enter their registered email address in the provided field on the Forgot Password screen. • The system shall ensure that once the user submits the email, a password reset request will be sent to the admin. The admin will review the request and send new login credentials to the user's email.	

FRD 2: Sign Up

ID	Description	Images/Notes
2.1	The system shall ensure that upon clicking "Get Started" or "Sign Up," the user will be navigated to the sign-up screen.	
2.2	The system shall ensure that the user will see a multi-step form for the sign-up process	
2.3	• The system shall ensure that the user is required to provide the following personal information: ○ First Name ○ Last Name ○ Business Name ■ DBA (Doing Business As) ○ Business Number ○ Industry Type ○ Email ○ Phone Number ○ Shipping Types (e.g., Pallet, Packages, E-commerce) • The system shall ensure that in the next step, the user is required to provide the following business information: ● Business Mailing Address ● Unit Number ● State ● Country ● ZIP Code ● City	

	.	
2.4	Once the user has completed the sign-up form, they will be shown a confirmation screen thanking them for submitting their details. The admin will review the information and either approve or reject the request.	
2.5	The system shall ensure that the sign-up form details submitted by the user will be sent to the admin side for review.	
2.6	The system shall ensure that if the admin approves the user, the user will receive a notification via email with their credentials.	
2.7	The system shall ensure that if the admin rejects the sign-up request, the user will be properly informed of the reason and will be able to resubmit the form after correcting the issues or filling in any missing fields.	The system shall ensure that the user will be able to resubmit the sign-up request if needed.

FRD 3: Dashboard

ID	Description	Images/Notes
----	-------------	--------------

3.1	The system shall ensure that after logging in, the user will be able to access the Main dashboard.	
3.2	The system shall ensure that when the user is on the dashboard, they will see their name and designation at the top, along with key metrics providing an overview of the system.	
3.3	The system shall ensure that the user will be able to see the total number of shipments sent, total orders placed, and pending amounts they need to pay.	
3.4	The system shall ensure that the user will be able to see recent orders with detailed information.	
3.5	The system shall ensure that the user will be able to see key metrics, such as top locations and the total amount spent so far, as well as which carrier was used for the shipments.	
3.6	The system shall ensure that the user will be able to see the number of shipments made in a month in a graphical format. A calendar will also be available for the user to view their shipments.	
3.7	The system shall ensure that the user will have access to a navigation bar with options such as: Home, Quick Quote, Shipments, Tracking, Claims and Support, Pickups, and Settings.	The user will not be able to change the password and username from settings. In the settings module user can add multiple emails from a notifications perspective.
3.8	The system shall ensure that when the user clicks on any of these modules, they will be navigated to the respective pages.	
3.9	The system shall ensure that there is a notifications icon that shows notifications to the user and provides updates about the status of shipments and orders.	

3.10	The system shall ensure that the system provides a proper overview to the users of their actions.	
3.11	The system shall ensure that the user will be able to see any claims as metrics on the dashboard.	

FRD 4: Quick Quote Flow

ID	Description	Images/Notes
4.1	The system shall ensure that when the user clicks on "Quick Quote" or "Quote," they will be navigated to the quote screen where they can see the quote form.	
4.2	- The system shall ensure that the user will see fields for "Ship From" and "Ship To." - The system shall ensure that when the user fills in the "Ship From" and "Ship To" sections, they will be able to see the following fields: - Postal Code - City - Province - Country - Location Type (Dropdown to select) - The system shall ensure that users will be able to save addresses.(either ship from or ship) - Users can save both addresses. - The system shall ensure that the user will be able to select the package type, such as: - Pallet - Package - Courier Pak - Envelope - The system shall ensure that based on the package type selected, the user will be able to see the dimensions and weight section. - The system shall ensure that if the user selects "Pallet," they will be able to see the following fields: - Quantity - Length (in) - Width (in) - Height (in) - Weight (lbs) - Freight Class (Optional)	The user will enter only the postal code rest address fields will be fetched automatically.

	○ Type ○ Pieces ○ Description	
4.3	The system shall ensure that the user will be able to add a description related to the package in a text field.	
4.4	● The system shall ensure that on clicking "Save Pallet," the pallet dimensions will be saved for future use. ● The system shall ensure that on clicking "My Pallets," the user will be able to see their existing saved pallets, and on selecting a specific pallet, the dimensions and data will be fetched. ● The system shall ensure that on clicking "Clear," all data will be cleared, and the user can start a new entry.	Recent Quotes will be gone into Quotes Main screen in the form of list. Admin will be notified for recent quotes and not proceeding.
4.5	The system shall ensure that the user will be able to select units, either metric or imperial.	
4.6	The system shall ensure that the user can add multiple pallets and packages to obtain shipping quotes.	A maximum of 10 pallets can be created.
4.7	The system shall ensure that each new addition of a package or pallet will update the quantity and dimensions accordingly.	
4.8	● The system shall ensure that once the user has filled in the necessary details, they can select additional services from the additional services section. ● The system shall ensure that the user will be able to select additional services from a dropdown menu.	
4.9	● The system shall ensure that once the user has filled in all the details, they will be able to select the insurance value for the goods they are shipping. ● The system shall ensure that the user will be able to enter the insurance value of the goods they are shipping.	Not required to add Insurance.

4.10	The system shall ensure that once the user has entered all the information, they can save the quote for future use.	
4.11	The system shall ensure that when the user saves the quote, they will be able to view it in the "Saved Quotes" section.	
4.12	The system shall ensure that the user will be able to see a "Get Rates" button at the bottom.	
4.13	The system shall ensure that on clicking "Get Quote," the user will be able to view rates from different carriers.	
	SHIPPING RATES	
4.14	- The system shall ensure that once the user has filled out the quote form and clicked "Get Rates," they will be redirected to the shipping rates screen. - The system shall ensure that the user will be able to view shipping rates from different providers.	
4.15	- The system shall ensure that the user will be able to see the following information on the screen: - Carrier - Service - Est. Transit - Total Price (this will also include a breakdown of the price, including Base Price, Fuel, Liftgate Delivery, Residential Delivery, Insurance Charge, and HST ON)	Total Price breakdown in the form of tooltip
4.16	- The system shall ensure that there will be two buttons: one for selection and one showing "Insurance Added." Upon clicking "Select," the carrier will be chosen. - The system shall ensure that the user will be able to see "Best Price" and "Quickest Rate" sections, similar to freight.com, showing which carrier companies offer the best and quickest rates.	

	• The system shall ensure that there will be a toggle before the rates are displayed, allowing the user to turn it on or off to show or hide the rates. • The system shall ensure that user will be able to see both USD AND CAD rates. ◦ He can click either checkbox to see the rates. • The system shall ensure that the user will be able to see the both rates one with insurance and one without insurance if he didn't selected previously. • The system shall ensure that the user can download the rates along with all the previous information the user entered. ◦ This can be viewed in the recent quotes too and also can be downloadable from recent quotes too.	
4.17	• The system shall ensure that after viewing the rates and selecting a suitable option, the user will be able to see a "Convert to Shipment" button at the bottom. Upon clicking this, the shipment the user will be redirected to the pickups screen.	
	PICKUP	
4.18	• The system shall ensure that once the user clicks on the "Convert to Shipment" button, they will be navigated to the pickup screen. • The system shall ensure that once the user is on the pickup screen, they must fill out details for the pickup location, point of contact, and pickup timing.	
4.19	• The system shall ensure that the user will see the following fields on the pickup screen: ◦ Pickup Date ◦ Pickup Time ◦ Closing Time ◦ Pickup Location	

	○ Note ○ Point of Contact Name ○ Point of Contact Number (Required Field) ○ POC Email Address. ● The system shall ensure that the user provides the Consignee's Company Details, which must include: ○ Company Name ○ Address ○ City ○ State ○ ZIP Code ○ Country The system shall ensure that if the shipment is cross border then the system shall also show the following to the user:	
CROSS BORDER SHIPMENT	● The system shall ensure that user will be prompted or see the section to upload custom docs. ● If the shipment is a cross-border shipment, the system shall ensure that the user is prompted to upload or create the necessary Custom Documents for verification. This step will be mandatory before the pickup is confirmed. ● The system shall ensure that the user can either create custom documents or attach existing files for cross-border shipments, which will be used for customs clearance and verification purposes. ○ The system shall ensure that if user create a custom doc then he will be able to download the template if any and then upload back to the system in the form of pdf,xlx. ● The system shall ensure that for cross-border shipments, the user will be required to provide Custom Broker Information, which includes: ○ Broker Name ○ Broker Email ○ Broker Company Name ○ Broker Phone Number ○ Broker Address ● The system shall ensure that user will be able to upload custom invoice too.	

	○ The system shall ensure that user can upload the custom invoice directly or if not they will be able to see the template and download the template first. ○ The system shall ensure that user will be able to download the template and then fill in the data and again can upload the template into the system. ○ The user will have the option to either fill out the form offline and upload it back into the system.	
	PAYMENT AND SHIPMENT CONFIRMATION	
4.20	● The system shall ensure that once the user has filled out the pickup details, they will receive confirmation of the shipment order along with a tracking ID.	
4.21	● The system shall ensure that once the shipment is placed, the user will be able to view the payment screen and enter their payment details. ● The system shall ensure that once the payment is processed, the user will receive a tracking number(pol number and shipping label which are generated automatically against that shipment) and shipment confirmation.	
	If the shipment is cross border flow here before payments and stored against that information.	

FRD 5: Recent and Saved Quotes

ID	Description	Images/Notes
5.1	• The system shall ensure that when generating a Quick Quote, if the user saves the quote, they will be able to view it in the "Saved Quotes" section. • The system shall ensure that the user will be able to see the Recent and Saved Quotes screen, which will have two segment sections or a toggle. ○ One section will be for Recent Quotes, and the other will be for Saved Quotes. The default view will display both recent and saved quotes.	When user clicked on the Recent and Saved Quotes from the dashboard in the Quote Section
5.2	The system shall ensure that the user will be able to see all the details saved accurately.	
5.3	• The system shall ensure that the user will be able to see the following details: ○ Saved Date ○ Ship From ○ Ship To ○ Charges ○ Ship Button	
5.4	The system shall ensure that the user will be able to filter quotes by date to view saved quotes within specific date ranges.	
5.5	The system shall ensure that when the user clicks the toggle for Recent Quotes or Saved Quotes, only the selected category data will be displayed in a table format.	
5.6	The system shall ensure that the admin will be notified when the user generates recent quotes but does not convert them into shipments. The admin will also be notified if the user is continuously obtaining quotes without proceeding further.	
5.7		

FRD 6: Shipment Module

ID	Description	Images/Notes
6.1	The system shall ensure that when the user clicks on the "Shipments" module from the home dashboard, they will be redirected to the shipment module.	
6.2	- The system shall ensure that the user will be able to view a list of all their shipments, including detail stats such as: - Shipment types (Pallet, Courier, Packages, Envelope) - Shipment counts (e.g., Today's Shipments, Ready For Shipping, In Transit, Exceptions, Canceled, Delivered)	
6.3	The system shall ensure that the user will be able to see the list of the shipments in table format where they will be able to see the shipment id , date , carrier , amount , status of the shipment and action column to (View, Download Documents)	Documents are for Quotes in the form of pdf. Either save or can download Quote.
6.4	- The system shall ensure that the user will be able to see the "Create Shipment" button in the shipment module. - The system shall ensure that when the user clicks on "Create New Shipment," they will be prompted to enter shipment details such as: Ship From and Ship To fields, including: - Postal Code - City - Province - Country - Location Type - Package type selection, including: - Pallet - Package	

	■ Courier Pak ■ Envelope ○ Based on the package type, the user will see fields for dimensions and weight. ● If the user selects "Pallet," the following fields will be displayed: ○ Quantity ○ Length (in) ○ Width (in) ○ Height (in) ○ Weight (lbs) ○ Freight Class ○ Type ○ Pieces ○ Description ● The system shall ensure that after filling out the shipment form, similar to the Quick Quote process, the user will be able to view shipping rates from carriers and then proceed to schedule a pickup. ● The system shall ensure that the user will be able to see a summary and overview of the shipment details before proceeding to payment. ○ The system shall ensure that the user can make changes to the shipment details by clicking "Edit Details" to revert to the previous screens.	
6.5	● The system shall ensure that the user can search for shipments by: ○ Name ○ Location ○ ShipmentID ● The system shall also allow filtering of shipments by: ○ Carrier ○ Packaging Type ○ Shipment Status ○ Service ○ Order Destination	

	○ Postal/Zip Code ○ Destination ○ Date range ○ Clear Filters	
6.6	● The system shall ensure that when the user clicks on a specific shipment order, they will be redirected to the shipment detail page, where they can view an overall summary of shipment details, payment status, shipping details, and shipment status.	

FRD 7: Tracking

ID	Description	Images/Notes
7.1	The system shall ensure that when the user clicks on the "Tracking" option from the home page, they will be redirected to the tracking screen	
7.2	The system shall ensure that the user will be prompted to enter the tracking ID provided at the time of order confirmation.	
7.3	The system shall ensure that the user will be able to view the accurate status of the shipment, fetched through the carrier provider's tracking system. The statuses could include "In Transit," "Pickup," "Delivered," etc.	

FRD 8: Claims

ID	Description	Images/Notes
8.1	The system shall ensure that when the user clicks on the "Claims" option from the dashboard, they will be redirected to the claims module.	
8.2	• The system shall ensure that the user will be able to see a list of all previously filed claims with their statuses (e.g., Approved, Terminated, Settled). • The system shall ensure that upon clicking a specific claim, the user will be able to view the form they originally submitted for the claim. • The system shall ensure that the user will be able to file claims only for shipments that are insured.	
8.3	• The system shall ensure that the user can search claims using: ○ Claim Number ○ ShipmentID • The system shall also ensure that claims can be filtered by: • Carrier • Date • Service • Claim Status • Packaging Type • Shipment Status • Clear Filters	
8.5	• The system shall ensure that dynamic results are displayed based on the filters applied. • The system shall ensure that the user will be able to click on the "Submit New Claim" button.	
8.6	• Upon clicking "Submit New Claim," the user will be able to fill out the claim form with the following fields:	

	○ Tracking No. ○ Reason for Claim * (Dropdown) ○ Contact Preference * ○ Email * ○ Phone * ○ Subject * ○ Description * ○ Add Files ○ Comments ○ Submit Button	
8.7	● The system shall ensure that the user will be able to create tickets from the claims module if they encounter any issues with the shipment. The ticket form will include the tracking number, issue details, and a submit button. ● The system shall ensure that all claims and issues will be directed to the admin for resolution.	

FRD 9: Support and Tickets

ID	Description	Images/Notes
9.1	● The system shall ensure that the user will be able to create support tickets for any issues related to shipments ● The system shall ensure that when the user is in the "Claims and Support" module, clicking on "Create Support Ticket" will display a form where the user needs to enter basic details, such as tracking number, issue subject and description and file upload and then submit the ticket.	

9.2	• The system shall ensure that upon submitting the support ticket, the user will receive a confirmation message indicating that the ticket has been successfully submitted. • The system shall ensure that the submitted support ticket will be sent to the admin, who will respond accordingly.	
9.3	The system shall ensure that the user will be able to view a list of all previously submitted tickets in a table format, along with their current status (e.g., "Under Review," "Completed").	

FRD 10: Invoicing and Payments

ID	Description	Images/Notes
10.1	The system shall ensure that once the user has filled in the shipment details and booked the shipment, they will be navigated to the payment screen, where they can choose from the available payment methods.	
10.2	The system shall ensure that the user will be able to efficiently enter the payment amount and other necessary details.	
10.3	• The system shall ensure that the user will be able to select a payment method, either by: ○ Credit Card ○ Email Transfer	

	• The system shall ensure that the above two payment methods will be available to users all the time as instant payment methods. • The system shall ensure that for the Net 30 Days payment method, the user has to do some shipments on the credit card and then can contact the admin through ticket support for the threshold credit system ○ The system shall ensure that the admin will allow the credit system to the user if he eligible for that ○ The system shall ensure that if the user is eligible for the threshold credit system he will be then also able to select credits he has or credit card for the shipment payment method. ○ The system shall ensure that for the email transfer until the payment is approved by the admin till then it will be shown to the user as not verified once the admin verified the payment it will show the status paid.	
10.4	• The system shall ensure that if the user selects any payment method other than credit card, the payment will be sent to the admin for verification. Once verified, the admin can mark the payment as approved and confirm the order. • The system shall ensure that if the user is using email transfer for the shipment he will be able to upload the proof there. ○ The system shall ensure that the user will be able to see the form type pop up for uploading receipt either in the form of jpg, pdf or text. ○ The system shall ensure that the user can copy and paste text into the text field or also upload ○ The system shall ensure that if the payment type is email transfer or cheque admin will be	

	able to see that in the payment section against that shipment or user and mark as approved..	
10.5	• The system shall ensure that once the payment is processed, an invoice will be automatically generated with the correct details related to the shipment and user. • The system shall ensure that the invoice is stored and linked to the related shipment. • The system shall ensure that the payment is processed successfully within the platform, and if any issues arise, the user will be prompted accordingly.	

FRD 11: Notifications/Reminders

ID	Description	Images/Notes
11.1	The system shall ensure that the user can view a list of notifications and reminders, which will be sorted based on date, time, title, and message.	
11.2	The system shall ensure that the user can mark notifications and reminders as read or unread.	
11.3	The system shall ensure that the user has the option to delete, archive.	
11.4	The system shall ensure that the user can filter and sort notifications/reminders based on date, time, title, or type (e.g., email or in-platform notifications).	

11.5	The system shall ensure that the user can manage notification preferences, including opting for email notifications, platform-based notifications, or both.	
------	---	--

FRD 12 : Reporting

ID	Description	Images/Notes
12.1	- The system shall allow users to generate reports based on specific data across various modules (e.g., shipments, invoices, claims) - Users will be able to select the type of report they want to generate, such as activity reports, transaction reports, or status reports. - Reports will be generated dynamically based on the most up-to-date data available in the system.	(General and graphical format for reports)
12.2	The system shall ensure that users will be able to navigate to the reporting dashboard on clicking the report module from the nav bar. The system shall ensure that when the user is on the dashboard he will be able to see previously generated reports with titles date of generation and download button. The system shall ensure that users can click on the generate report button and fill the selection criteria as described below.	
12.3	Reports will be generated dynamically based on the most up-to-date data available in the system.	
12.4	The system shall provide filtering options to narrow down report results based on: - Date range (e.g., today, last week, custom range) - Categories (e.g., shipment type, claim type, payment method) - Status (e.g., completed, pending, in transit) - User-defined criteria (e.g., locations, usernames, shipment IDs)	

	• Users can apply multiple filters at once to customize the report data to suit their needs. • The system shall enable users to sort report data by columns, such as: ○ Date ○ Status ○ Amount ○ Location ○ Shipment or Claim Type ○ Sorting options will allow users to view data in ascending or descending order for each field. • The system shall ensure that user will be able to generate reports for finances.	
12.5	• The system shall allow users to select which fields they want to include in their reports (e.g., for shipment reports: origin, destination, carrier, shipment status, etc.). • Users can choose between detailed and summary reports, depending on their requirements.	
12.6	The system shall allow users to export generated reports into various formats, such as: • PDF • Excel (CSV or XLSX) • JSON or XML (for integration with other systems) The system shall ensure that all report formats are clean, easy to read, and suitable for sharing or record-keeping.	

FRD 13: Settings Module

ID	Description	Images/Notes
13.1		

	• The system shall ensure that when the user clicks on the "Settings" option from the navigation bar, they will be navigated to the Settings module. • This module will display the following sections: Personal Information: Displays the personal information the user provided during the sign-up process. • Business Information: Displays the business information provided during the sign-up process.	
13.2	• The system shall ensure that the user can view and edit their personal information, such as First Name, Last Name, Email, and Phone Number, in the Personal Information section. • The system shall ensure that the user can view and edit their business information, such as Business Name, Address, and Industry Type, in the Business Information section. • The system shall ensure that any changes made by the user to their personal or business information will be sent to the admin for approval. The admin will review the updates, and upon approval, the information will be updated in the system. ○ The system shall ensure that if the admin detects any redundant or suspicious information in the user's updated details, they can place the user's account on hold for further verification.	
13.3	• The system shall ensure that the user will not be able to change their username or password through the Settings module. These fields will remain locked. ○ The system shall ensure that if any issues related to email password user can contact	

	the admin through forgot password and receive new credentials in the email.	
13.4	The system shall ensure that the user can add multiple email addresses in the Settings module for receiving notifications. These email addresses will be used to send important system updates and notifications.
