

MGC FREIGHT – USER STORIES DOCUMENT

USER MODULE – MGC FREIGHT

FRD 1: LOGIN

1.1 Receiving Credentials After Signup

User Story:

As a user, I want to receive my credentials via email after completing the signup process so that I can access my account securely.

Acceptance Criteria:

- **Given** the user has completed the signup process and their application has been approved by the admin,
- **When** the admin finalizes the approval in the system,
- **Then** the system should automatically send an email to the user containing their login credentials (email and password).

1.2 Logging in with Email and Password

User Story:

As a user, I want to log in using my registered email and password so that I can securely access my dashboard.

Acceptance Criteria:

- **Given** the user has valid login credentials,

- **When** the user enters their email and password on the login screen and clicks the “Login” button,
- **Then** the system should authenticate the credentials using MFA and strict authorization mechanisms and redirect the user to their dashboard.

1.3 Handling Invalid Login Attempts

User Story:

As a user, I want to be notified if I enter incorrect credentials so that I can correct them and log in successfully.

Acceptance Criteria:

- **Given** the user enters incorrect credentials,
- **When** the system validates the credentials,
- **Then** the system should display an error message indicating invalid email or password.
- **Given** the user repeatedly enters incorrect credentials (5–10 times),
- **When** the limit is reached,
- **Then** the system should lock the account and display a message that the account is temporarily locked.
- **Given** the account is locked,
- **When** the admin reviews and unlocks it,
- **Then** the user should regain access to the login functionality.

1.4 Authenticated Access Only

User Story:

As a user, I want only authenticated users to be able to access protected pages so that my data remains secure.

Acceptance Criteria:

- **Given** an unauthenticated user attempts to access a protected area of the platform,
- **When** the system checks for an active authenticated session,
- **Then** the user should be redirected to the login page.

1.5 Forgot Password Button Navigation

User Story:

As a user, I want a "Forgot Password" button on the login screen so that I can reset my credentials if needed.

Acceptance Criteria:

- **Given** the user is on the login screen,
- **When** they click the "Forgot Password" link,
- **Then** the system should redirect them to the Forgot Password page.

1.6 Reset Password Request

User Story:

As a user, I want to request a password reset by providing my registered email so that I can regain access to my account.

Acceptance Criteria:

- **Given** the user is on the Forgot Password screen,
- **When** they enter their registered email and submit the form,
- **Then** the system should send a password reset request to the admin.
- **Given** the admin approves the request,

- **When** the admin sends updated credentials,
- **Then** the user should receive an email containing their new login information.

FRD 2: SIGN UP

2.1 Navigating to Signup Screen

User Story:

As a new user, I want to click on “Get Started” or “Sign Up” so that I can begin my registration process.

Acceptance Criteria:

- **Given** the user is on the landing page,
- **When** they click the “Get Started” or “Sign Up” button,
- **Then** the system should redirect them to the signup screen.

2.2 Multi-Step Signup Form Display

User Story:

As a new user, I want to see a multi-step signup form so that I can complete my registration step-by-step.

Acceptance Criteria:

- **Given** the user is on the signup page,
- **When** the signup screen loads,
- **Then** the system should display a two-step form with navigation buttons (“Next,” “Back”).
- **Then** the first step should collect personal information, and the second should collect business information.

2.3 Providing Personal and Business Details

User Story:

As a user, I want to provide my personal and business details so that my account can be created accurately.

Acceptance Criteria:

- **Given** the user is on the signup form,
- **When** they complete all required fields, including:
 - First Name, Last Name, Business Name, DBA, Business Number, Industry Type, Email, Phone, Shipping Types, Business Address, Unit Number, City, State, ZIP, Country,
- **Then** the system should validate the inputs and move to the next step.
- **Then** all mandatory fields should be required before submission.

2.4 Confirmation Screen

User Story:

As a user, I want to see a confirmation screen after completing my signup so that I know my registration was submitted successfully.

Acceptance Criteria:

- **Given** the user has filled in and submitted all required fields,
- **When** the system successfully records the data,
- **Then** a “Thank You” confirmation message should appear, indicating that the admin will review the details.

2.5 Admin Review of Signup Request

User Story:

As a user, I want my signup details sent to the admin for review so that my account can be approved or rejected.

Acceptance Criteria:

- **Given** the user has submitted their signup form,
- **When** the submission is completed,
- **Then** the system should forward the signup data to the admin panel for review.

2.6 User Notification on Approval

User Story:

As a user, I want to be notified once my signup request is approved so that I can log in using the provided credentials.

Acceptance Criteria:

- **Given** the admin approves the signup request,
- **When** approval is submitted,
- **Then** the system should send an email notification to the user containing login credentials.

2.7 User Notification on Rejection

User Story:

As a user, I want to be notified if my signup request is rejected so that I can correct and resubmit my details.

Acceptance Criteria:

- **Given** the admin rejects the signup request,
- **When** the rejection is submitted with a reason,

- **Then** the system should send an email to the user explaining the rejection reason and providing an option to resubmit the corrected form.

FRD 3: DASHBOARD

3.1 Dashboard Access Post Login

User Story:

As a user, I want to access my dashboard after logging in so that I can view my account overview.

Acceptance Criteria:

- **Given** the user has successfully logged in,
- **When** authentication is verified,
- **Then** the system should redirect the user to the dashboard.

3.2 Displaying User Information and Metrics

User Story:

As a user, I want to see my personal information and key performance metrics on the dashboard so that I can monitor my activities.

Acceptance Criteria:

- **Given** the user is on the dashboard,
- **When** the dashboard loads,
- **Then** the system should display:
 - User name and designation
 - Total shipments sent

- Total orders placed
- Pending payments
- Recent orders
- Monthly shipment graph
- Top locations and carriers used

3.3 Recent Orders Overview

User Story:

As a user, I want to view a list of my recent orders so that I can quickly track my latest activities.

Acceptance Criteria:

- **Given** the user is on the dashboard,
- **When** recent order data exists,
- **Then** the system should display the most recent shipments with key details (ID, date, carrier, amount, status).

3.4 Navigation Bar Access

User Story:

As a user, I want to access different modules through a navigation bar so that I can easily move between features.

Acceptance Criteria:

- **Given** the user is on the dashboard,
- **When** they click a navigation item (Home, Quick Quote, Shipments, Tracking, Claims, Support, Pickups, Settings),
- **Then** the system should redirect to the respective page.

3.5 Notification Center

User Story:

As a user, I want to view notifications on my dashboard so that I can stay updated about my shipments and orders.

Acceptance Criteria:

- **Given** the user is on the dashboard,
- **When** a new notification is triggered (e.g., order update, shipment status),
- **Then** the system should display it under the notification icon.
- **Given** the user clicks the notification icon,
- **When** they view the list,
- **Then** notifications should be marked as read.

3.6 Access to Settings

User Story:

As a user, I want to access my settings from the dashboard so that I can manage my notification preferences and personal details.

Acceptance Criteria:

- **Given** the user is on the dashboard,
- **When** they click on “Settings” in the navigation bar,
- **Then** the system should redirect them to the Settings module.

FRD 4: QUICK QUOTE FLOW

4.1 Navigating to Quick Quote Screen

User Story:

As a user, I want to click on the “Quick Quote” button and be redirected to the quote screen so that I can create a shipment quote easily.

Acceptance Criteria:

- **Given** the user is logged in and on the dashboard,
- **When** they click on “Quick Quote” or “Quote,”
- **Then** the system should redirect them to the quote form screen.

4.2 Entering Shipment Details

User Story:

As a user, I want to enter “Ship From” and “Ship To” details so that I can generate an accurate shipping quote.

Acceptance Criteria:

- **Given** the user is on the Quick Quote screen,
- **When** they begin filling in “Ship From” and “Ship To” fields,
- **Then** the system should display the following fields: Postal Code, City, Province, Country, and Location Type dropdown.
- **Given** the user enters a valid postal code,
- **When** the field is validated,
- **Then** the system should auto-fetch the remaining address details.

4.3 Selecting Package Type and Dimensions

User Story:

As a user, I want to select a package or pallet type and enter its dimensions so that I can calculate the shipping cost accurately.

Acceptance Criteria:

- **Given** the user is on the quote form,
- **When** they select a package type (Pallet, Package, Courier Pak, or Envelope),
- **Then** the system should dynamically display relevant dimension and weight fields.
- **Given** the user selects "Pallet,"
- **When** the pallet type is selected,
- **Then** the system should show: Quantity, Length, Width, Height, Weight, Freight Class (optional), Type, Pieces, and Description fields.

4.4 Saving, Viewing, and Clearing Pallet Data

User Story:

As a user, I want to save, view, and clear my pallet details so that I can reuse them later or start a new entry easily.

Acceptance Criteria:

- **Given** the user enters pallet details,
- **When** they click "Save Pallet,"
- **Then** the system should store the pallet details for future use.
- **Given** the user wants to reuse an existing pallet,
- **When** they click "My Pallets,"
- **Then** the system should display a list of saved pallets with selectable entries.
- **Given** the user wants to start a new entry,
- **When** they click "Clear,"
- **Then** all fields should reset to blank.

4.5 Adding Package Description

User Story:

As a user, I want to add a description for my package so that I can specify additional details for shipping.

Acceptance Criteria:

- **Given** the user is filling in the shipment form,
- **When** they enter a description in the text field,
- **Then** the system should save that description with the shipment data.

4.6 Selecting Measurement Units

User Story:

As a user, I want to choose between metric or imperial units so that I can enter my data in my preferred format.

Acceptance Criteria:

- **Given** the user is on the quote screen,
- **When** they select a unit option,
- **Then** the form should update field placeholders to reflect the chosen system (e.g., cm/kg or in/lbs).

4.7 Adding Multiple Packages or Pallets

User Story:

As a user, I want to add multiple packages or pallets to a single quote so that I can calculate combined shipping rates.

Acceptance Criteria:

- **Given** the user is filling out a quote,
- **When** they click on “Add Package” or “Add Pallet,”
- **Then** the system should allow adding additional entries (up to 10 pallets).
- **Then** all totals and quantities should update accordingly.

4.8 Selecting Additional Services

User Story:

As a user, I want to select optional services (like liftgate, residential delivery, etc.) so that I can include all necessary shipping requirements.

Acceptance Criteria:

- **Given** the user has filled the basic shipment form,
- **When** they open the “Additional Services” dropdown,
- **Then** they should be able to select multiple additional options.
- **Then** the system should include those options in rate calculations.

4.9 Adding Insurance Value

User Story:

As a user, I want to enter an insurance value for my goods so that my shipment is insured during transit.

Acceptance Criteria:

- **Given** the user wants insurance,
- **When** they enter a value in the “Insurance Value” field,
- **Then** the system should include that value in the rate calculation and quote summary.

4.10 Saving Quotes

User Story:

As a user, I want to save my quote for future reference so that I can access it later.

Acceptance Criteria:

- **Given** the user has filled out the quote details,
- **When** they click on "Save Quote,"
- **Then** the system should save the quote and store it under "Saved Quotes."

4.11 Viewing Saved Quotes

User Story:

As a user, I want to view my saved quotes so that I can reuse or modify them later.

Acceptance Criteria:

- **Given** the user has previously saved quotes,
- **When** they navigate to the "Saved Quotes" section,
- **Then** the system should display all saved quotes with summary details.

4.12 Getting Rates

User Story:

As a user, I want to view shipping rates from multiple carriers based on my entered details so that I can select the best option.

Acceptance Criteria:

- **Given** the user has filled out all mandatory shipment fields,
- **When** they click on "Get Rates,"

- **Then** the system should fetch rates from various carriers and display them with:
 - Carrier Name
 - Service Type
 - Estimated Transit Time
 - Total Price with breakdown (Base, Fuel, Liftgate, Insurance, Tax, etc.).
- **Then** users should be able to toggle between USD and CAD or download the rate results.

4.13 Selecting Carrier and Converting to Shipment

User Story:

As a user, I want to select a carrier from the list and convert my quote into a shipment so that I can proceed with booking.

Acceptance Criteria:

- **Given** the user has viewed the available rates,
- **When** they click on “Select” for a carrier,
- **Then** that carrier should be highlighted as chosen.
- **Given** the user has chosen a carrier,
- **When** they click on “Convert to Shipment,”
- **Then** the system should redirect them to the Pickup screen to schedule shipment pickup.

FRD 5: RECENT AND SAVED QUOTES

5.1 Viewing Recent and Saved Quotes

User Story:

As a user, I want to view both my recent and saved quotes so that I can access my past rate inquiries easily.

Acceptance Criteria:

- **Given** the user navigates to the “Recent & Saved Quotes” page,
- **When** the page loads,
- **Then** the system should display two sections: Recent Quotes and Saved Quotes.
- **Then** the user should be able to view quote details such as Date, Ship From, Ship To, Charges, and “Ship” button.

5.2 Filtering Quotes by Date

User Story:

As a user, I want to filter my quotes by specific date ranges so that I can find relevant quotes quickly.

Acceptance Criteria:

- **Given** the user is on the “Recent & Saved Quotes” page,
- **When** they select a date range filter,
- **Then** the system should display quotes matching the chosen period.

5.3 Toggle Between Recent and Saved Quotes

User Story:

As a user, I want to toggle between recent and saved quotes so that I can view one category at a time.

Acceptance Criteria:

- **Given** the user is on the quotes screen,

- **When** they toggle to “Recent Quotes,”
- **Then** only recent quotes are displayed.
- **Given** they toggle to “Saved Quotes,”
- **Then** only saved quotes are shown in table format.

5.4 Admin Notification for Unused Quotes

User Story:

As a user, I want my recent quotes that are not converted to shipments to notify the admin so that admin can track engagement.

Acceptance Criteria:

- **Given** the user generates a quote but does not proceed to shipment,
- **When** the quote is saved in “Recent Quotes,”
- **Then** the system should send a notification to the admin panel.

FRD 6: SHIPMENT MODULE

6.1 Navigating to Shipment Module

User Story:

As a user, I want to access my shipment module so that I can manage and track my shipment orders.

Acceptance Criteria:

- **Given** the user is logged in and on the dashboard,
- **When** they click on “Shipments,”

- **Then** the system should redirect to the shipment list screen.

6.2 Viewing Shipment List

User Story:

As a user, I want to view a list of all my shipments with key details so that I can monitor their status.

Acceptance Criteria:

- **Given** the user is on the shipment module page,
- **When** the page loads,
- **Then** the system should display shipments in a table with: Shipment ID, Date, Carrier, Amount, and Status columns.
- **Then** each row should include an action column for “View” or “Download Documents.”

6.3 Creating a New Shipment

User Story:

As a user, I want to create a new shipment so that I can send goods to my customers.

Acceptance Criteria:

- **Given** the user is on the shipment module page,
- **When** they click “Create Shipment,”
- **Then** the system should open the shipment creation form similar to Quick Quote.
- **Given** the user fills out shipment details,
- **When** they confirm the form,
- **Then** the system should generate shipping rates and allow scheduling a pickup.

6.4 Editing and Reviewing Shipment Summary

User Story:

As a user, I want to review my shipment summary before payment so that I can confirm the details.

Acceptance Criteria:

- **Given** the user completes shipment entry,
- **When** the system displays a summary screen,
- **Then** the user should be able to review and click “Edit Details” if changes are needed.

6.5 Filtering and Searching Shipments

User Story:

As a user, I want to filter and search shipments so that I can quickly locate specific orders.

Acceptance Criteria:

- **Given** the user is on the shipment list screen,
- **When** they use the search bar or filters (Carrier, Type, Status, Date Range, etc.),
- **Then** the system should refresh the list to display only matching shipments.

6.6 Viewing Detailed Shipment Information

User Story:

As a user, I want to view detailed information for a specific shipment so that I can check its progress and details.

Acceptance Criteria:

- **Given** the user is on the shipment list,

- **When** they click a shipment ID or “View” action,
- **Then** the system should display the shipment detail screen including:
 - Shipment Summary
 - Payment Status
 - Shipping Details
 - Shipment Status and Tracking

FRD 7: TRACKING

7.1 Navigating to the Tracking Screen

User Story:

As a user, I want to navigate to the tracking screen so that I can check the current status of my shipment.

Acceptance Criteria:

- **Given** the user is logged in and on the dashboard,
- **When** they click on the “Tracking” option in the navigation bar,
- **Then** the system should redirect them to the Tracking screen.

7.2 Entering Tracking ID

User Story:

As a user, I want to enter my tracking ID so that I can retrieve my shipment’s current status.

Acceptance Criteria:

- **Given** the user is on the Tracking screen,
- **When** they enter a valid tracking ID in the input field and click “Track,”

- **Then** the system should fetch the shipment status using the carrier's tracking system.

7.3 Viewing Shipment Status

User Story:

As a user, I want to view the latest shipment status so that I can monitor where my shipment currently is.

Acceptance Criteria:

- **Given** the system has retrieved tracking information from the carrier,
- **When** the data is displayed,
- **Then** the user should see accurate status updates such as "Pickup," "In Transit," "Delivered," or "Exception."
- **Given** the tracking ID is invalid or expired,
- **When** the user clicks "Track,"
- **Then** the system should show an appropriate error message (e.g., "Invalid Tracking ID" or "No Record Found").

FRD 8: CLAIMS MODULE

8.1 Accessing the Claims Module

User Story:

As a user, I want to access the claims module from my dashboard so that I can manage shipment-related claims.

Acceptance Criteria:

- **Given** the user is logged in and on the dashboard,

- **When** they click the “Claims” option from the navigation menu,
- **Then** the system should redirect them to the Claims screen displaying a list of existing claims.

8.2 Viewing List of Claims

User Story:

As a user, I want to view all my submitted claims so that I can check their current statuses.

Acceptance Criteria:

- **Given** the user is on the Claims page,
- **When** the page loads,
- **Then** the system should display a table of all claims with columns such as Claim Number, Shipment ID, Date, and Status (Pending, Approved, Settled, or Terminated).
- **Given** there are no claims,
- **When** the page loads,
- **Then** the system should display a “No Claims Found” message.

8.3 Searching and Filtering Claims

User Story:

As a user, I want to search and filter claims so that I can quickly locate specific ones.

Acceptance Criteria:

- **Given** the user is on the Claims list,
- **When** they use filters (Carrier, Claim Status, Shipment ID, Date, or Packaging Type),
- **Then** the system should update the results dynamically to match the selected filters.

- **Given** the user clears filters,
- **When** they reset the search,
- **Then** the system should display all available claims again.

8.4 Submitting a New Claim

User Story:

As a user, I want to submit a new claim for a shipment so that I can report a damaged or missing package.

Acceptance Criteria:

- **Given** the user is on the Claims screen,
- **When** they click “Submit New Claim,”
- **Then** the system should display a claim form with required fields:
 - Tracking Number
 - Reason for Claim (Dropdown)
 - Contact Preference (Email or Phone)
 - Email
 - Phone
 - Subject
 - Description
 - Add Files (Upload option)
 - Comments
 - Submit Button
- **Given** the user fills in all mandatory fields,

- **When** they click “Submit,”
- **Then** the system should validate inputs and send the claim to the admin for review.
- **Given** the submission is successful,
- **When** it’s processed,
- **Then** the user should see a confirmation message (“Claim submitted successfully”).

8.5 Viewing Claim Details

User Story:

As a user, I want to view the details of my submitted claim so that I can track its progress.

Acceptance Criteria:

- **Given** the user is on the Claims list,
- **When** they click a specific claim number,
- **Then** the system should open the claim details view displaying all submitted information and current status.
- **Given** the admin updates the claim status,
- **When** the claim is modified,
- **Then** the system should automatically update the user’s view and send a notification about the change.

8.6 Creating a Support Ticket Claims Module

User Story:

As a user, I want to create a ticket from within the claims module if I encounter a related issue so that I can request help easily.

Acceptance Criteria:

- **Given** the user is viewing a claim,
- **When** they click “Create Ticket” or “Report Issue,”
- **Then** the system should open a new support ticket form prefilled with the related tracking number and issue details.
- **Given** the ticket is submitted,
- **When** the system validates the data,
- **Then** the admin should receive the ticket for resolution.

FRD 9: SUPPORT AND TICKETS

9.1 Accessing Support and Tickets Module

User Story:

As a user, I want to access the Support and Tickets module so that I can report any issues related to my shipments or payments.

Acceptance Criteria:

- **Given** the user is on the dashboard,
- **When** they click on “Claims & Support” from the navigation menu,
- **Then** the system should open the Support and Tickets screen showing a list of existing tickets and a “Create New Ticket” button.

9.2 Creating a New Support Ticket

User Story:

As a user, I want to create a support ticket so that I can get assistance from the admin team regarding my issue.

Acceptance Criteria:

- **Given** the user is on the Support screen,
- **When** they click “Create New Ticket,”
- **Then** the system should open a new form with fields:
 - Tracking Number (Optional)
 - Issue Subject
 - Issue Description
 - File Upload (Optional)
 - Submit Button
- **Given** the user fills in the form and clicks “Submit,”
- **When** validation passes,
- **Then** the system should send the ticket to the admin for review.
- **Then** the user should receive an on-screen confirmation message and email acknowledgment that the ticket was submitted successfully.

9.3 Viewing Submitted Tickets

User Story:

As a user, I want to view all my previously submitted tickets so that I can monitor their progress.

Acceptance Criteria:

- **Given** the user has submitted one or more tickets,
- **When** they open the Support and Tickets screen,
- **Then** the system should display a table showing all tickets with the following columns: Ticket ID, Subject, Date Submitted, and Status (“Under Review,” “In Progress,” “Resolved,” or “Closed”).
- **Given** the user clicks on a specific ticket,

- **When** the ticket details load,
- **Then** the system should display all ticket information and any admin responses.

9.4 Receiving Confirmation and Updates

User Story:

As a user, I want to receive a confirmation and updates when my ticket status changes so that I stay informed.

Acceptance Criteria:

- **Given** the admin updates a ticket's status,
- **When** the status changes (e.g., from "In Progress" to "Resolved"),
- **Then** the system should notify the user via email and in-app notification.
- **Given** the ticket is resolved,
- **When** the admin marks it as completed,
- **Then** the user should receive a confirmation message stating "Your ticket has been resolved successfully."

9.5 Viewing Ticket History and Status

User Story:

As a user, I want to view my entire ticket history and current statuses so that I can reference past issues.

Acceptance Criteria:

- **Given** the user is on the Support page,
- **When** they scroll through their ticket list,
- **Then** the system should display all historical tickets with their respective statuses.

- **Then** the user should have the ability to filter by date, status, or issue type to quickly find older tickets.

FRD 10: INVOICING AND PAYMENTS

10.1 Navigating to the Payment Screen

User Story:

As a user, I want to navigate to the payment screen after confirming my shipment so that I can complete the payment process.

Acceptance Criteria:

- **Given** the user has confirmed a shipment,
- **When** the shipment creation process is completed,
- **Then** the system should automatically redirect the user to the payment screen where they can review payment details.

10.2 Entering Payment Details

User Story:

As a user, I want to enter the required payment details so that my shipment payment can be processed smoothly.

Acceptance Criteria:

- **Given** the user is on the payment screen,
- **When** they enter all required payment fields such as amount, shipment ID, and method,
- **Then** the system should validate and prepare the payment for processing.

10.3 Selecting Payment Method

User Story:

As a user, I want to choose a preferred payment method so that I can pay using my preferred option.

Acceptance Criteria:

- **Given** the user is on the payment screen,
- **When** they open the payment method dropdown,
- **Then** the system should display options including:
 - Credit Card
 - Email Transfer
 - Net 30 Days (for eligible users only)
- **Given** the user selects “Email Transfer,”
- **When** they upload proof of payment (image/PDF/text),
- **Then** the admin should be notified for verification.
- **Given** the payment method is “Credit Card,”
- **When** the transaction is submitted,
- **Then** the system should process it instantly and confirm payment success.

10.4 Admin Verification for Non-Card Payments

User Story:

As a user, I want the admin to verify my non-credit card payments so that my shipment can be marked as paid.

Acceptance Criteria:

- **Given** the user has made an email transfer,
- **When** the admin verifies the receipt,

- **Then** the system should update the payment status to “Paid” and notify the user.

10.5 Invoice Generation and Storage

User Story:

As a user, I want an automatic invoice generated for every shipment payment so that I can keep records of my transactions.

Acceptance Criteria:

- **Given** the user’s payment has been processed successfully,
- **When** the transaction completes,
- **Then** the system should automatically generate an invoice with details including shipment ID, amount, payment method, and date.
- **Then** the generated invoice should be linked to the corresponding shipment and stored in the user’s account for download.

FRD 11: NOTIFICATIONS & REMINDERS

11.1 Viewing Notifications List

User Story:

As a user, I want to view all notifications and reminders so that I can stay updated about system activities.

Acceptance Criteria:

- **Given** the user is logged in,
- **When** they click the notification icon from the dashboard,
- **Then** the system should open a list of notifications sorted by date and time.

- **Then** each notification should display a title and message.

11.2 Marking Notifications as Read or Unread

User Story:

As a user, I want to mark notifications as read or unread so that I can keep track of important updates.

Acceptance Criteria:

- **Given** the user is viewing the notification list,
- **When** they click on a notification,
- **Then** the system should mark it as “Read.”
- **Given** the user right-clicks or selects a “Mark as Unread” option,
- **When** confirmed,
- **Then** the notification should revert to unread status.

11.3 Deleting or Archiving Notifications

User Story:

As a user, I want to delete or archive notifications so that I can manage my notification center effectively.

Acceptance Criteria:

- **Given** the user is on the notifications list,
- **When** they select one or more notifications and click “Delete,”
- **Then** the selected notifications should be removed from the list.
- **Given** the user chooses “Archive,”

- **When** confirmed,
- **Then** the selected notifications should move to the “Archived” section.

11.4 Filtering and Sorting Notifications

User Story:

As a user, I want to filter and sort notifications so that I can find specific updates easily.

Acceptance Criteria:

- **Given** the user is viewing notifications,
- **When** they apply filters by date, title, or type,
- **Then** the list should update to display matching results.
- **Given** the user sorts by “Newest” or “Oldest,”
- **When** the sort order is applied,
- **Then** notifications should rearrange accordingly.

11.5 Managing Notification Preferences

User Story:

As a user, I want to manage how I receive notifications so that I can choose between email or in-app alerts.

Acceptance Criteria:

- **Given** the user is on the Notification Settings screen,
- **When** they choose their preferences,
- **Then** the system should save their choice between:
 - Email Notifications

- In-Platform Notifications
 - Both
- **Then** future notifications should be delivered accordingly.

FRD 12: REPORTING

12.1 Generating Reports

User Story:

As a user, I want to generate reports based on my activities so that I can analyze performance and transactions.

Acceptance Criteria:

- **Given** the user is logged in,
- **When** they click the “Reports” module in the navigation bar,
- **Then** the system should redirect to the Reports Dashboard.
- **Given** the user clicks “Generate Report,”
- **When** they select filters (report type, date range, category, status),
- **Then** the system should generate a report with the latest data.

12.2 Viewing Previously Generated Reports

User Story:

As a user, I want to view all my previously generated reports so that I can download or review them later.

Acceptance Criteria:

- **Given** the user is on the Reports Dashboard,
- **When** the page loads,
- **Then** the system should display a list of past reports with fields: Report Name, Date Generated, and Download Button.
- **Given** the user clicks on a report,
- **When** they select "Download,"
- **Then** the system should download the file in the chosen format (PDF, Excel, CSV).

12.3 Filtering and Sorting Report Data

User Story:

As a user, I want to filter and sort my report results so that I can view only relevant information.

Acceptance Criteria:

- **Given** the user has a report open,
- **When** they apply filters like date, status, shipment type, or amount,
- **Then** the displayed report data should update accordingly.
- **Given** the user chooses a sort option (ascending or descending),
- **When** the sort action is performed,
- **Then** the report data should reorder based on the selected field.

12.4 Selecting Report Fields

User Story:

As a user, I want to choose which fields appear in my report so that I can customize it to my needs.

Acceptance Criteria:

- **Given** the user is generating a new report,
- **When** they select fields such as origin, destination, carrier, shipment status, or amount,
- **Then** the system should generate the report containing only the chosen fields.

12.5 Exporting Reports

User Story:

As a user, I want to export generated reports in multiple formats so that I can share or archive them.

Acceptance Criteria:

- **Given** the user has generated a report,
- **When** they click the “Export” button,
- **Then** the system should prompt format options: PDF, Excel, CSV, JSON, or XML.
- **Then** upon selection, the system should download the report in the chosen format.

FRD 13: SETTINGS MODULE

13.1 Navigating to Settings

User Story:

As a user, I want to access the Settings module from my navigation bar so that I can view and manage my account details.

Acceptance Criteria:

- **Given** the user is logged in,
- **When** they click on “Settings” in the navigation bar,

- **Then** the system should redirect them to the Settings module showing Personal and Business Information sections.

13.2 Viewing and Editing Personal Information

User Story:

As a user, I want to view and edit my personal information so that I can keep my account details accurate.

Acceptance Criteria:

- **Given** the user is in the Settings module,
- **When** they view the Personal Information section,
- **Then** the system should display editable fields for First Name, Last Name, Email, and Phone Number.
- **Given** the user updates these fields and clicks “Save,”
- **When** the submission is successful,
- **Then** the updated information should be sent to the admin for approval.

13.3 Viewing and Editing Business Information

User Story:

As a user, I want to view and update my business details so that my records remain current.

Acceptance Criteria:

- **Given** the user is on the Business Information section,
- **When** they modify details like Business Name, Address, or Industry Type,
- **Then** the updates should be sent to the admin for verification before final approval.
- **Given** the admin rejects or flags the update,

- **When** the user next logs in,
- **Then** a notification should inform them that their update is under review or on hold.

13.4 Restricting Username and Password Changes

User Story:

As a user, I should not be able to change my username or password from the Settings module to maintain security integrity.

Acceptance Criteria:

- **Given** the user is on the Settings screen,
- **When** they view their account information,
- **Then** the username and password fields should be disabled and read-only.
- **Given** the user needs to change their password,
- **When** they attempt to do so,
- **Then** the system should prompt them to use the “Forgot Password” process instead.

13.5 Adding Additional Notification Emails

User Story:

As a user, I want to add multiple email addresses for notifications so that my team members also receive updates.

Acceptance Criteria:

- **Given** the user is in the Settings module,
- **When** they click “Add Email,”
- **Then** a new input field should appear for entering an additional email address.

- **Given** the user submits the new email,
- **When** it's validated,
- **Then** the system should save it and include it in the notification distribution list.
