1. Introduction

The purpose of this document is to outline the business requirements for the development of the OOHUP PLATFORM. This web application aims to facilitate the browsing, booking, and purchasing of media inventory and to quickly build advertising campaigns, providing a robust platform for advertisers and media owners.

2. Project Overview

OOHUP is designed to streamline the browsing, booking, and purchasing of media inventory and advertising campaigns. It connects advertisers and media owners, enhancing user interaction and engagement through various features, including inventory management, booking and scheduling, campaign management, and advanced mapping tools.

3. Objectives and Scope

Objectives:

- Develop a user-friendly web application.
- Implement features that enhance user engagement and interaction.
- Provide detailed information and resources for media owners and advertisers.
- Ensure high standards of security and privacy.
- Create a responsive design accessible across various devices.
- Facilitate efficient media inventory management with advanced search and filter options.
- Enhance campaign planning and execution through integrated mapping and visualization tools.
- Enable seamless booking and scheduling processes for advertisers and media owners.
- Support dynamic pricing strategies with customizable rate management.
- Promote collaboration and communication among users with integrated tools and features.
- Ensure scalability to support business growth and increased user base.
- Designed to be open and extendable to ensure future compatibility and ease of API integration.
- Ensuring the platform is optimized for mobile devices, both for advertisers and media owners
- Advanced Analytics and Reporting.
- The platform will work perfectly for both in-store/Outdoor Advertising.

Scope: The project includes the development of a comprehensive web application with the following modules:

1. Advertiser Platform

- 1.1. Landing Page
- 1.2. Dashboard
- 1.3. Production Management
- 1.4. Booking and Scheduling
- 1.5. Campaign Builder and Management
- 1.6. Creative Management
- 1.7. Integration Capabilities
- 1.8. Advanced Mapping Features
- 1.9. List View/Grid View
- 1.10. Automated Buying / Managed Buying
- 1.11. Checkout Page
- 1.12. Bulk Campaigns
- 1.13. Approvals/Requests
- 1.14. Vendor Profiles/ Past Orders
- 1.15. Payment Acceptance
- 1.16. Configure Measurement / Analytics Reporting (Social Media, Website)
- 1.17. MAPS and Filterations.

2. Media Owner Dashboard

- 2.1. Landing Page
- 2.2. Dashboard
- 2.3. Production Management
- 2.4. Bookings/Schedulings
- 2.5. Inventory Database Upload (Media Inventory Database, Measurement Data, Creative Specs Files)
- 2.6. Inventory Management
- 2.7. Import/Export Module
- 2.8. Media File / Creatives
- 2.9. Notifications
- 2.10. Request /Approvals
- 2.11. Customer Histories (Past Campaign Data)
- 2.12. Customer Proposals (Linked to Campaign Checkout Agreement from Platform)
- 2.13. Payment Track
- 2.14. Reporting

3. Admin

- 3.1. CRUD Operations
- 3.2. Manage Users
- 3.3. Manage Payments

3.4. Reporting

4. Stakeholders

- **Project Sponsor:** *OOHUP PLATFORM*
- **Project Manager:** Shahzad Ali
- **Business Analyst:** Waleed Bhatti
- **Development Team:** Daniyal Nasir
- **Quality Assurance Team:** [Names]
- **End Users:** Advertisers, Media Owners, Admins

5. Functional Requirements

Requirements for Advertiser Platform:

1. Dashboard

- Overview of ongoing and past campaigns.
- Key performance indicators (KPIs) and metrics.
- Alerts and notifications for campaign milestones and updates.
- Display featured media inventory
- Search bar for quick access to media inventory.
- Highlights of current campaigns and promotions
- MAPS interactions and MAPS view.
- Central search feature for quick access to media inventory.
- Filters.

2. Landing Page

- Header with Logo and Navigation Links.
- Hero Section: Engaging images and text to attract users.+
- Call-to-Actions (CTAs): Links/buttons for advertiser sign-up and media owner registration.
- Display curated list of featured media inventory items.
- "How it Works" Section: Brief explanation with visuals or video.

3. Production Management

- Overlooking the Production Progress
- Details of Production Companies
- Progress Tracker with Detailed Information
- Reporting and Feedback

4. Booking and Scheduling

- Real-time availability checks for media inventory.
- Booking confirmation and reminders.

5. Campaign Builder and Management

- Create and manage advertising campaigns.
- Define campaign goals and target audience.

- Budget allocation and optimization tools.
 - Assign creatives to campaigns.
 - Track campaign performance.
 - Add/Edit/delete.
- 6. Creative Management**
- Library of creative assets.
 - Integration with third-party creative tools.
 - Version control and approval workflow.
- 7. Integration Capabilities**
- API access for third-party integrations.
 - Data import/export functionalities.
 - Compatibility with industry-standard tools.
- 8. Advanced Mapping Features**
- Geolocation-based search for media inventory.
 - Visual representation of media locations.
 - Route planning and coverage analysis.
 - Legends Views for All type of categories (OOHUP Internal/Outdoor)
- 9. List View/Grid View**
- Detailed list of available media inventory.
 - Filter and sort options.
 - Quick actions for booking and inquiries.
 - Interactive views for both list and grid based on filtration.
- 10. Automated Buying / Managed Buying**
- Automated workflows for the buying includes Payment workflows scenarios.
 - **Advertiser need to give proper details for automated buying or select manually in forms. (RFT Proposal) (Will be discussed with Umair at the time of FRD Creation)**
- 11. Checkout Page**
- Secure payment gateway integration.
 - Summary of booking details.
 - Order confirmation and receipt generation.
- ESCROW (UMAIR DISCUSSION)**
- 12. Reporting**
- Customizable reports on campaign performance.
 - Exportable data formats (CSV, PDF).
 - Scheduled report delivery via email.
- 13. Bulk Campaigns**
- Tools for managing multiple campaigns simultaneously.
 - Bulk upload and editing features.
 - Consolidated campaign analytics.
 - Bulk Checkout
 - FOODPANDA OR DARAZ
- 14. Approvals/Requests**
- Workflow for campaign and creative approvals.

- Request modifications and feedback.
- Approval history tracking.
- 15. Vendor Profiles/ Past Orders**
 - Profile pages for media vendors.
 - History of past orders and interactions.
 - Ratings and reviews for vendors.
- 16. Payment Acceptance**
 - Multiple payment options (credit card, bank transfer).
 - Invoice generation and tracking.
 - Secure transaction processing.
 - Payment Flow
- 17. Configure Measurement / Analytics Reporting**
 - Integration with social media and website analytics.
 - Real-time performance tracking.
 - Customizable dashboard for analytics.
- 18. MAPS and Filters:**
 - Interactive results on the basis of filters.
 - Geolocation Search: Search by landmarks, addresses, proximity, and keywords.
 - Heatmaps & Audience Overlay: Visualize foot traffic, demographics, time-based heatmaps, behavioral data, and road traffic data.
 - Radius Targeting and Draw Tool: Customizable and multiple radii, layered radii visualization.
 - Route Planning: Plan media spots along common commute paths, custom routes, and route optimization with real-time traffic data.
 - Cluster Management: Group media spots into clusters, view performance, and customize clusters.
 - Interactive Map Features: Smooth zoom and pan, toggle data layers, drawing tools, and POI integration.
 - Filter by media type, availability, price range, and demographics.
 - Save browsing sessions and search queries.
 - Save Campaigns and Favorites
 - View only OOH or only in-store media.
- 19. Request for Proposal:**
 - **The details fetched from the Advertiser in the Campaign Builder will be shared with different oohup vendors in the form Request for proposal.**

Requirements for Media Owner Dashboard

- 1. Homepage**
 - Same as Advertiser
 - LogIn as Media Owner
- 2. Dashboard**
 - Detailed view of inventory status.
 - Performance metrics and KPIs.
 - Notifications for pending actions.

- Overview of available inventory.
- Alerts for new bookings and requests.
- Summary of recent activities and notifications.

3. Production Management

- Upload and manage media inventory and assign to specific production.
- List of production companies.
- Define creative specifications.
- Schedule media production timelines.
- Overlooking the Production Progress
- Details of Production Companies
- Progress Tracker with Detailed Information
- Reporting and Feedback

4. Bookings/Scheduling

- Calendar view of booked slots.
- Manage booking requests and approvals.
- Real-time updates on availability.
- Production Overview
- Schedule campaigns on a calendar interface.
- View and manage campaign timelines.
- Integration with booking and inventory management.

5. Inventory Database Upload

- Media Inventory Database
- Measurement Data
- Creative Specs Files
- Bulk upload functionality.
- Integration with external inventory databases.

6. Inventory Management

- Tools for managing and updating inventory.
- Import/export modules for data management.
- Real-time inventory status updates.
- Add/edit/delete

7. Media File / Creatives

- Library for media files and creative assets.
- Version control and approval workflow.
- Integration with creative management tools.

8. Notifications

- Alerts for new bookings, approvals, and requests.
- Customizable notification settings.
- Real-time updates and reminders.

9. Request / Approvals

- Workflow for handling booking requests.

- Approval and rejection options.
- History of requests and approvals.
- 10. Customer Histories (Past Campaign Data)**
 - Access to past campaign data.
 - Customer interaction history.
 - Analytics and performance reports.
- 11. Customer Proposals (Linked to Campaign Checkout Agreement from Platform)**
 - Generate customer proposals.
 - Link proposals to campaign checkout agreements.
 - Track proposal status and history.
- 12. Payment Track**
 - Tools for tracking payments.
 - Invoice management.
 - Payment history and status updates.
 - Distribution like payment flow document sent by Umair.
 - Point of collection is enabled with Payment Gateway.

Requirements for Admin

- 1. CRUD Operations**
 - Create, Read, Update, and Delete functionalities for all entities.
 - User-friendly interface for managing data.
 - Access control and permissions management.
- 2. Manage Users**
 - User account management.
 - Role-based access control.
 - User activity monitoring and reporting.
- 3. Manage Payments**
 - Monitor and manage transactions.
 - Payment gateway integration.
 - Financial reporting and reconciliation tools.

6. Non-Functional Requirements

- 1. Security**
 - Implement robust security measures to protect user data.
 - Compliance with industry standards and regulations.
 - Regular security audits and vulnerability assessments.
- 2. Performance**
 - Ensure the platform is responsive and performs well under load.
 - Optimize database queries and application logic.
 - Load balancing and caching strategies.
- 3. Usability**
 - Intuitive and user-friendly interface.
 - Consistent user experience across all devices.

- Accessibility compliance (WCAG).
- 4. **Scalability**
 - Design the platform to handle increased user load.
 - Support for future growth and feature expansion.
 - Scalable infrastructure and architecture.
- 5. **Availability**
 - Ensure high availability and minimal downtime.
 - Redundant systems and failover mechanisms.
 - Regular backups and disaster recovery plans.

7. Assumptions

1. All stakeholders are available for requirements gathering and validation.
2. Necessary third-party integrations and APIs are accessible.
3. Adequate resources (time, budget, personnel) are allocated for the project.

8. Constraints

1. Adherence to project timeline and milestones.
2. Compliance with legal and regulatory requirements.
3. Budget limitations and financial constraints.

9. Dependencies

1. Dependency on third-party services for payment processing.
2. Integration with external inventory databases and analytics tools.
3. Coordination with marketing and sales teams for campaign management.

10. Glossary

- **OOH:** Out Of Home
- **API:** Application Programming Interface
- **CRUD:** Create, Read, Update, Delete
- **KPI:** Key Performance Indicator
- **POI:** Points of Interest.

11. Roles and Functionality

- **Advertisers:** Users who create and manage advertising campaigns.
- **Media Owners:** Users who manage media inventory and bookings.
- **Admins:** Users who manage the platform, users, and payments.
