

Functional Requirements Document (FRD)

Project Name: Oohup Marketplace

Module: Admin Module

1. Introduction

This document outlines the functional requirements for the Admin Module in the Oohup Marketplace platform. The purpose of this document is to detail the necessary features, use cases, user stories, and acceptance criteria to guide the development and design of the Platform.

2. Functional Requirements:

1- Login

BRD#	FRD ID	Description	Images/Notes
	1.1	The system shall ensure that only authorized users can log in.	
	1.2	The system shall display an alert or error message if an unauthorized user attempts to log in.	

		Admins must log in using their pre-assigned email and password.	
--	--	---	--

2- Dashboard

BRD#	FRD ID	Description	Images/Notes
	2.1	Upon logging in, the admin shall be presented with a dashboard displaying key metrics, providing immediate insights into activities on both the media owner and advertiser sides.	
	2.2	The dashboard shall display: - Total number of advertisers - Total number of media owners (+ In-store & traditional Media owners separately) - Number of ongoing campaigns - Number of completed campaigns - Support requests - In-store campaigns (if any) - Orders in production - Overall revenue, depicted through graphs Clicking any key metric shall redirect the admin to the corresponding detailed page.	
	2.3	The system shall ensure that data on the dashboard, including KPIs, is updated in real-time.	
	2.4	The admin shall be able to view accurate, up-to-date information.	

	2.5	The system shall ensure that when a user accesses the dashboard, the following navigation options are visible on the left panel: ● Advertisers ● Media Owners - Traditional - Instore ○ Venues ○ Upload Bulk Access. ● In-store Orders ● Roles and Accessibility ● Reporting ● Settings	
--	-----	---	--

3- Advertisers

BRD#	FRD ID	Description	Images/Notes
	3.1	Clicking on the 'Advertisers' tab shall display a list of all registered advertisers in a table format.	
	3.2	The admin shall be able to view and manage advertiser details including: ● Name ● Email ● Contact information ● Company Name ● Company Details ● Company Business Email ● Advertisers Position ● Company Trade License (if applicable) ● Campaign Order History ● Campaign count ● Current orders ● Last worked with vendor	

		• Actions (edit, delete, blacklist)	
	3.3	• The system shall ensure that when an admin clicks 'Edit' from the action column, an edit form with pre-filled data will be displayed, allowing the admin to make updates. • The system shall ensure that the edit form is updated and saved correctly.	
	3.4	The system shall require a reason when an admin clicks 'Delete' or chooses to blacklist from the action column. The admin must provide feedback explaining the reason for deleting or blacklisting the advertiser. Following this, the advertiser will be deleted or blocked as specified.	
	3.5	The system shall allow the admin to apply sorting and filters, including date ranges and locations, to search for advertisers.	
	3.6	A button for adding new advertisers shall redirect the user to a form where they can enter the advertiser's details including email, name, phone number, contact information, and password.	
	3.7	• Clicking on a specific advertiser shall open a detailed screen showing all ongoing orders and details about the media owner involved. • The system shall ensure that the admin can view detailed information about the number of orders an advertiser has ongoing or completed.	
	3.9	• The system shall ensure that the admin can upload advertisers in bulk. • The system shall ensure that there is an option For admin to upload the advertisers in bulk	

		• The system shall ensure that the advertiser can see the template in the form of xls, so the corrected data can be uploaded. • The system shall ensure that the advertiser when uploaded in bulk data can be uploaded correctly and stored in db.	
	3.9	• The system shall ensure that admin will be able to be redirected to the detail page when clicked on the single advertiser. • The system shall ensure that admin will be able to see the all orders of that admin and the media owner he has worked, • The system shall ensure that admin will be also able to see the all active or past orders. • The system shall ensure that admin when clicked on the order detail, he will be navigated to the order detail page where he can see the details of that specific order.	

4- Media Owners

BRD#	FRD ID	Description	Images/Notes
	4.1	Accessing the 'Media Owners' section from the navigation bar shall display a list of all media owners in a table format.	
	4.2	The admin shall be able to view: • Name • Company name	

		• Phone number • Date registered • Email • Media type (traditional or in-store) • Active orders • Total orders completed • Total earnings • Actions (edit, delete, blacklist)	
	4.3	Filters and sorting shall be available for viewing in-store vs. traditional media owners, registration dates, and sorting by latest entries.	
	4.4	Clicking on a specific media owner shall navigate to a detail page showing the total orders completed, which advertiser they worked with, and allow navigation to order invoices or details.	
	4.5	The system shall ensure that the admin will be able to see a list of all venues, shops, and units in detail related to the media owner on the details page.	
	4.6	• The system shall ensure that advertiser will be able to see the list of all the shops related to traditional, instore of the specific media owner. • The system shall ensure that when admin click on the venues he will be able too see all the related venues, shops related to instore media owner.	

		The system shall ensure that the admin will also be able to add venues, shops and units on behalf of the media owner.	
	4.7	The system shall ensure that the admin will be able to see all the orders related to each media owner relatively.	

5- Instore/Requests Order

BRD#	FRD ID	Description	Images/Notes
	5.1	When an in-store order is placed, the admin shall be notified and will be able to view it under the 'In-Store Orders/Requests' section.	
	5.2	The admin shall see a detailed table format screen showing: - Which advertiser placed the order - Unit details - Creatives - Which media owner is associated - Full Campaign Details (If this Instore Order is part of a campaign that includes Traditional units also) - The system shall ensure that user will be able to see all the details related to the campaigns.	
	In-Store Creatives management / Requests	The System shall ensure submitted In-store Creatives (images, Videos) can be viewed, approved or declined (request re-upload / creative not approved require changes)	

		• If Creative artwork requires revision, a request and notification must be sent to advertiser to reupload. • The system shall ensure that if there is any case related to the instore and that need specific changes, the feedback form will be available to the media owner. • The system shall ensure that media owner will be able to fill the feedback form and send back to the advertiser.	
	5.3	The admin shall be able to view and modify the production and order status.	
	5.4	• The system shall ensure that the admin will be able to see the order details , including which advertiser placed the order, Campaign details & ID unit details, and creatives, all of which the media owner can also view. • The same functionality will be applied here for any media owner being followed	
	5.5	• The system shall ensure the admin will be able to see the production status and order status and will also be able to modify these statuses • The actions the admin performs on this in-store order side will be mirrored on the media owner side.	

6- Roles and Permissions

BRD#	FRD ID	Description	Images/Notes
	6.1	The system shall allow the admin to assign different roles to users based on their accessibility.	
	6.2	In the 'Roles and Accessibility' section, the admin shall see registered users along with their roles, names, emails, access levels, and occupations.	
	6.3	A form shall appear to add or assign users with specific access levels: view, edit, and delete.	
	6.4	Users with 'Edit' access can perform editing functions, those with 'View' can only view, and those with 'Delete' can perform delete functions.	
	6.5	• The admin shall not be able to delete any inventory venues or orders that are currently being processed. • The system shall ensure that before an admin attempts to delete anything, it will ask for re-verification modal, such as 'Are you sure you want to delete?'	

7- Reporting

BRD#	FRD ID	Description	Images/Notes
------	--------	-------------	--------------

	7.1	Upon accessing the 'Reporting' section from the navigation panel, the admin shall be presented with a comprehensive suite of reporting tools that compile and display data across various operational metrics of the marketplace related to the advertisers or media owners.	
	7.2	• The system shall enable the admin to generate customizable reports that can include data on revenue, user activities, campaign performance. • The admin can select specific metrics and filters to tailor the reports to their needs. • The system shall ensure that an admin can select advertiser or media owner from dropdown and select the criteria like date and generate reports. • System shall ensure generation of campaign wise reports to be shared with advertisers on platform and through email • System shall ensure media owners can submit campaign wise reports to OOHUP, to be used for advertiser reports • The system shall ensure that admin will be able to see the reports generated by the media owner against the specific campaign • The system shall ensure that admin will be able to see the correct report against the campaigns. • The system shall ensure that when admin sees the media owner campaign he will be able to see the report for campaign accordingly. • The system shall ensure that admin shall remind media owner through alerts for uploading reports.	

	7.3	The admin shall have the option to export reports in various formats (e.g., PDF, Excel, CSV) to facilitate easy sharing and further analysis.	
	7.4	The system shall ensure that all reports reflect real-time data, providing the admin with the most up-to-date information on the platform's operations.	
	7.5	The system shall allow the admin to schedule reports to be generated automatically at predetermined intervals (daily, weekly, monthly) and be sent to specified email addresses.	
	7.6	the system shall provide options for visual representation of data, such as graphs, pie charts, and histograms, making it easier for the admin to interpret the data and trends.	
	7.7	The admin shall be able to generate reports detailing user activities, including login times, actions taken, and changes made within the platform, to monitor user behavior and system usage.	

8- Notifications

BRD#	FRD ID	Description	Images/Notes
------	--------	-------------	--------------

	8.1	The system shall ensure that the admin will receive notifications directly on the dashboard. These notifications will be displayed in real-time, enabling the admin to stay informed about all pertinent activities, system alerts, and operational updates.	
	8.2	The system shall ensure that the admin can view all notifications in real-time as they occur. This feature is designed to keep the admin constantly aware of any immediate actions or updates that are required, enhancing responsiveness and decision-making.	
	8.3	- The system shall ensure that when the admin clicks on any notification from the notification tab, they will be redirected to the corresponding screen or section that the notification pertains to. - This functionality facilitates quick access and allows the admin to efficiently address or review the matters highlighted by the notifications.	
	8.4	The system shall ensure that all notifications related to admin activities on the platform, including any requests, approvals, or system updates, will also be sent to the admin via email. This ensures that the admin receives real-time alerts, even when not actively logged into the platform.	

9- Finances/payments

BRD#	FRD ID	Description	Images/Notes
	9.1	The system shall ensure that when the admin clicks on the 'Payments/Finances' option, they will be redirected to the finances screen. This	

		screen provides a comprehensive view of all financial transactions.	
	9.2	The system shall ensure that the admin can view a detailed list of all orders and their associated payments. This includes information on: • Who made the payment • To whom the payment was made • Payment dates • Timestamps • Payment amounts • Cleared amounts	
	9.3	The system shall ensure that the admin can view all payment transactions and their clearance stages. This functionality will allow the admin to track the progress of payments and manage financial operations efficiently.
