

# SPRK Music – Product Vision Document

## 1. Product Vision Statement

SPRK Music is a music-first short-form video platform designed to help independent artists showcase original performances and help fans discover, engage with, and support emerging talent through immersive video, social interaction, and discovery-driven experiences.

---

## 2. Problem Statement

Independent musicians struggle with visibility and meaningful discovery on general-purpose short-video platforms where music content competes with unrelated entertainment. Fans who want to explore new artists face fragmented discovery, low signal-to-noise ratios, and limited artist-focused interaction tools.

There is a need for a platform that:

- Prioritizes original music content
  - Enables direct artist–fan interaction
  - Supports structured discovery by genre, role, and engagement
  - Treats artists and fans as distinct but connected user groups
- 

## 3. Target Users

### Primary Users

- **Artists**
  - Independent musicians, singers, instrumentalists, producers
  - Seeking exposure, audience growth, and feedback
- **Fans**
  - Music enthusiasts looking for new talent
  - Interested in following, engaging, and sharing music content

## Secondary Users

- Emerging creators experimenting with music content
  - Genre-focused listeners seeking curated discovery
- 

## 4. Value Proposition

### For Artists

- A dedicated music-centric platform with role-based identity
- Simple onboarding and multiple authentication options
- Powerful discovery via search, feeds, and engagement signals
- Direct interaction with fans through comments and messaging

### For Fans

- Personalized and trending music feeds
  - Rich interaction with videos and artists
  - Advanced search and filtering by genre, specialty, and popularity
  - Ability to curate favorites and rediscover content easily
- 

## 5. Product Overview

SPRK Music is a mobile-first social video application built around short music videos. The platform differentiates users by role (Artist or Fan), enabling tailored onboarding, discovery, and interaction flows while maintaining a unified social ecosystem.

The core experience revolves around:

- Video consumption and engagement
  - Artist discovery and fan interaction
  - Structured search and personalized feeds
- 

## 6. Core Product Pillars

### 6.1 Role-Based Identity

- Distinct Artist and Fan roles
- Role-aware signup, login, onboarding, and landing experiences
- Role-aware search prioritization and discovery

## **6.2 Seamless Access & Security**

- Multiple signup and login methods (email, username, social, passwordless)
- Account linking across providers
- Strong validation, session management, and security protections

## **6.3 Music-Centric Discovery**

- Personalized and trending feeds
- Search optimized for original content and emerging artists
- Filters by genre, specialty, and role
- Engagement-driven ranking

## **6.4 Rich Video Interaction**

- Full-featured video playback controls
- Likes, ratings, favorites, sharing, and reporting
- Comments with threading, editing, reactions, and tagging

## **6.5 Content Creation & Upload**

- Photo and video uploads from camera, gallery, and cloud
- Structured photo collections
- Clear validation, size limits, and error handling

## **6.6 Social Connectivity**

- Direct messaging between users
- In-app and external sharing
- Notifications for activity and engagement

## **6.7 Personalization & Curation**

- Favorites for content bookmarking
- Watch history for rediscovery
- Profile customization for better recommendations

---

## **7. Key Differentiators**

- Music-only content focus
- Artist-first discovery logic

- Role-aware platform behavior
  - Advanced search and filtering tailored to music discovery
  - Lightweight but expressive social interaction model
- 

## **8. In-Scope vs Out-of-Scope**

### **In Scope**

- Authentication and account management
- Video-first social feed
- Search, discovery, and engagement
- Content upload and playback
- Messaging and notifications

### **Explicitly Out of Scope (for current vision)**

- Monetization and payouts
  - Long-form content hosting
  - Label or rights management
  - Live streaming
- 

## **9. Success Metrics**

- Artist signup and activation rate
  - Fan engagement per video (likes, comments, shares)
  - Discovery metrics for emerging artists
  - Search-to-play conversion rate
  - Retention and repeat session frequency
  - Favorites and follow interactions
- 

## **10. Long-Term Vision**

SPRK Music aims to become the go-to discovery platform for independent music, where artists can grow organically and fans can reliably find original talent. Over time, the platform can evolve into a creator ecosystem supporting monetization, collaborations, and deeper fan engagement while preserving its music-first identity.
